

Administrator Guide

Administrator Guide

Setting defaults, look and feel, and permissions.

Contents

Rich Links

Site Administration

Documentation

Site administration is a primary responsibility of the administrator. This begins with installation of confluence.

Space Administration

Documentation

When your administrator sets Theme Press as Confluence's site theme, all spaces using the Global Look and Feel appear with a Theme Press default theme. We call this the site theme.

Page Administration

Documentation

The Theme Press Designer allows you to limit access to individual pages.

Theme Administration

Documentation

The theme is the main force that defines the look & feel of a Confluence site or individual space.

Architect Pages

Documentation

Architect pages are a key mechanism by which designers control the look & feel of a site. The pages individually manage the contents of key components of the site.
