

Interactive Search Macro

Relates To

TARGETED SEARCH

Interactive Search Macro

Prompt

Highly configurable and responsive search interface.

Definition

This macro brings the features and filtering you'll find on [Brikit Targeted Search's search page](#) to any page in your site. You are able to place an interactive search wherever you wish, and configure it to display an assortment of user-selectable filtering options.

This versatile search interface:

- Allows for tightly controlled searches, [configured by you](#)
- Responds when the user selects or removes any [filters](#) from [filter groups](#) that you may have included in [your configuration](#)
- Generates a list of search results directly below the input area
