

Setting Page Restrictions

Setting Page Restrictions

Prompt

Grant an individual user or group view and edit permissions for a particular page.

Outcome

In Confluence, you can override [Space](#) and [Global Permissions](#) to allow groups or individuals view and/or edit privileges for a specific page.

Steps

Know your role

In order to set page permissions, you must be either a [System Administrator](#) or [Confluence Administrator](#).

Navigate to the page and open the [Confluence Page Tools Menu](#)

This means opening the [Confluence Header](#). (if you are using [Brikit Theme Press](#), toggle the Header open by pressing the "shift" and "z" keys together).

Click the ellipsis button and select "Restrictions"

This will open the Restrictions modal window.

Select a restriction type from the dropdown

For example, click the dropdown and select "Viewing and editing restricted"

Type a Group or Individual User, select the permission, and click "Add"

As a reminder, the user or group must first exist in the system before you can add it to a page restriction.
