

Site Buildout

Configure your site with content to match your designs.

Highlights

Briket information architects and graphic designers follow your information and visual designs to build out your site quickly using Confluence and Briket add-ons such as Theme Press, Targeted Search, Content Flow, Pinboards, Blueprint Maker, and your other add-ons.

The process will follow implement, test, review, and refine iterations.

Covered by the [Service Terms Agreement](#) (sorry, no alterations or substitutions).

Per-project estimates given in Service Punchcards. [Contact us to get started](#).

The Fine Print

The Fine Print

GROUND RULES

Review sessions will be delivered remotely via web-based screen share by Briket experts (information architects and designers). Based on your preference, implementation will be performed on Briket's portal or your systems. Time required to gain access to your systems (include account setup, virtual private network access, and other on-boarding) will be logged against your Service Punchcards.

The Site Buildout and Service Punchcard tracking will be supported with your private portal (Confluence space) on our servers, which includes up to three user accounts. Your portal will be maintained for one year after completion of last service package or service punchcard. User accounts inactive for six months will be automatically disabled (simply contact us to reactivate).

EXCLUSIONS

*Note that the amount of Site Buildout help (and the specific number of pages we will build out for you) is entirely dependent on your budget. This service is purposely billed through punchcards, meaning you can pick the level of help you need.

EXTRAS

Additional [Service Punchcards](#) may be added at your option.

Licenses for software products are not included.
