Using Banners.mobile.phone

Prompt

Why When

Modifying the banner area is useful for delivering important announcements across all the pages of a space or site.

Before you begin

Effective use of banners will require overriding the default architect page for a space or your site–you'll need the appropriate level of permissions to accomplish this.

Steps
Build your Banner

1. In the Theme Press Default Space, make a copy `.brikit.banner.Empty` (the default)
2. Modify your copy

Style your Banner

Theme Press Control Panel > Theme Tab > Confluence > Banner

You can set:

- **Size**: Padding around your content
- **Background**: Color, image, position and more
- **Bottom Border**: Separating your banner from your page
- **Text**: Automatically modify your text

Be careful
Best Practices

- Use for systems maintenance alerts or company-wide announcements

- Prepare multiple alternate architect pages in advance
- Modify the color of the banner to indicate the level of importance

Related
Apply your Banner

- To a space
- To the entire site
