Targeted Search Field Macro

Prompt

Input field that launches a search with preconfigured parameters and filtering options.

Definition

This [macro](#) displays a search field that [opens the Search Panel](#).

The search can be [preconfigured](#) with [parameters](#) that you can set through the [configuration options in the macro](#), allowing for a more focused, narrower search.

You can also control the size and placement of the search field, as well as how many search results are displayed.

Info

This macro has many of the same capabilities as the [Targeted Search Link macro](#). The most salient distinction between the two macros is that you can have users enter their own initial search term(s) with this one.
