

# Editing or Deleting Filter Groups

Requires

TARGETED SEARCH

# Editing or Deleting Filter Groups

## Prompt

Making changes to existing filter groups.

## Outcome

As your site's [taxonomy](#) evolves, you may need to delete or change the name of an existing [filter group](#).

## Steps

### Locate the filter group you would like to rename or delete

Navigate to the [Targeted Search Filters page](#) and find the filter group you would like to rename or delete. It may be helpful to use the "Collapse All" button at the top of the page.

### Rename or delete the filter group

Click the gear icon in the "Actions" column that corresponds with the filter group. Select "Edit Filter Group" to rename or add a new [filter prefix](#). Or select "Delete Filter Group" to delete.

Note that deleting a filter group will also [delete all of its filters](#). If you would still like to use these filters, you may want to [recreate them in a different filter group](#) either before or after you delete this filter group.

## Note

## Tip

## Warning

Deleting or renaming a filter group may break instances of [macros](#) across your site that refer to that specific filter group in their configuration. Potentially affected macros include the [Interactive Search](#), Label Select Field, [Targeted Search Field](#), and [Targeted Search Link](#) macros. You may need to update the parameters in these macros after renaming or deleting filter groups to get them working again.
