

Labels

Labels

Prompt

Meaningful words attached to content and spaces.

Definition

Labels are words that you can attach to Confluence content to more easily identify, organize, and find/retrieve that content.

Labels can be attached to individual pieces of content (i.e., pages, blog posts, and attachments) as well as entire [spaces](#).

For more information, please see

[Atlassian's documentation on using labels](#).

Info

Users with [Brikit Targeted Search](#) installed have more options in how labels are presented, used, and organized. Check out [filters](#) and [filter groups](#) to learn more.
