

Macro Keys

Macro Keys

Prompt

Identifiers for macros in Confluence markup.

Definition

Macro keys are text strings that represent individual [macros](#) in

[Confluence markup](#).

For example, the key for the

[Blog Posts macro](#) is `blog-posts`.

Advanced users may want to [reference macro keys](#) when using wiki markup or when viewing or editing the [storage format of a page](#).

Macro keys are not required for normal use of Confluence or Brikkit macros.
