Confluence Base URL

Confluence Base URL

Prompt

The URL by which users access your site.

Definition

The Confluence base URL is the URL that is used to access your site. Thus it is the first part of every URL of every location in your site.

For example, this site's base URL is

https://www.brikit.com

It can be useful to know your base URL as you can navigate directly to specific areas or tools by appending the rest of the destination address to it.

Your site's base URL can be viewed (or

configured by a System Administrator) via the Confluence Administration menu:

Gear icon ⚙ in the Confluence header **General Configuration**: **Server Base URL** value, in Site Configuration section
