

Confluence Page Tools Menu

Confluence Page Tools Menu

Prompt

Also called the **Page Toolbar**, these are tools for page-level actions.

Definition

The Confluence Page Tools menu is a toolbar that facilitates page-level actions. On any page, it is located directly under the [Confluence Header](#), spanning the width of the page content area.

This menu provides fast access to the **Edit** page function for all users who have been granted permission to add/edit pages. The **Save for Later**, **Watch**, and **Share** options are also available to users who are logged in.

Many other actions, such as viewing attachments or page history, can be accessed when you click the **Ellipsis** icon on the right side of the toolbar.

Info

When [Brikit Theme Press](#) is installed and applied, users with permission to add/edit pages will also see a Block Edit option on this menu.

The Page Tools Menu (aka Page Toolbar) is a [Page Element](#) in a [Layout](#) and can be placed into the [Theme Press Header](#) or toggleable with the [Confluence Header](#).
