

Accessing the Brikit Blueprints Menu

Requires

BLUEPRINT MAKER

Accessing the BrikIt Blueprints Menu

Prompt

View available Blueprints and choose an action in the [Blueprints Menu](#).

Outcome

Users who have been granted permission to create [spaces](#) and/or pages can access the [BrikIt Blueprints Menu](#) via the [Confluence Header](#).

Steps

Open the Confluence Header

If the Confluence Header is not currently visible and you also have [BrikIt Theme Press](#) installed and enabled, you may need to use the "z" key, or "shift" and "z" keys together, to toggle open the Header. The Blueprints Menu is located in the Confluence Header.

Click the Blueprints button in the Confluence Header

A modal window displaying all [BrikIt Blueprints](#) that are currently available to you will appear. The Blueprints Menu also allows you to [regenerate a page](#) (if it was created from a Blueprint) or to [copy a space or page](#).

Note

Tip

Warning

Info

Please note that only users with either global permission to create spaces or permission to create pages in the current space will see the Blueprints button in the Confluence Header. If a user has neither type of permission in the current context, the Blueprints button will not appear to them.
