Updating Theme Press

Relates To

THEME PRESS

Updating Theme Press

Prompt

Updating Theme Press through the Universal Plugin Manager
Start in Confluence Administration

Navigate to the Universal Plugin Manager.

Find the app

Scroll down to find `Brikit Theme Press`.

Update Theme Press

Click the update button.

(The new version number will display when the update is complete.)

- Installation of Atlassian Confluence is a prerequisite to Theme Press installation.
- Reviewing the compatibility page before install is also recommended.

Some users have reported that after installing Comala apps on a site already using Theme Press, any Theme-Press enabled spaces fail to load (a "Page Not Found" message is shown). This is a known error with the way in which Confluence loads the order of these two apps.

The workaround is simply to *uninstall and then reinstall Theme Press.*
