

Updating Theme Press

Relates To

THEME PRESS

Updating Theme Press

Prompt

Updating Theme Press through the Universal Plugin Manager

Start in [Confluence Administration](#)

Navigate to the [Universal Plugin Manager](#).

Find the app

Scroll down to find Brikkit Theme Press.

Update Theme Press

Click the update button.

(The new version number will display when the update is complete.)

- Installation of Atlassian Confluence is a prerequisite to Theme Press installation.
- Reviewing the [compatibility page](#) before install is also recommended.

Some users have reported that after installing Comala apps on a site already using Theme Press, any Theme-Press enabled spaces fail to load (a "Page Not Found" message is shown). This is a known error with the way in which Confluence loads the order of these two apps.

The workaround is simply to *uninstall and then reinstall Theme Press*.
