You've reached the default space for Theme Press. This space uses the site theme and houses the architect pages.

Architect Pages

Use the following pages to build a Theme Press site and/or space. Your information architect can create additional pages when necessary. Content changed on architect pages can't be modified on site pages, but must be changed here.

 **Keep in Mind**

- Theme Press ignores empty pages.

Type	Name Starts With	Used to...
Banner	.brikit.banner	display system messages above the Confluence header
Header	.brikit.header	display content (like feature images or external links) in the canvas header
Menu	.brikit.menu	provide site/space navigation in the canvas header
Layout	.brikit.layout	define the structure of all associated pages
Footer	.brikit.footer	display content (like site map links, legal notices or copyright information) in the canvas footer
Mobile	.brikit.mobile	where all the mobile versions of the menus and footers reside
