BLUEPRINT MAKER

Blueprint Definitions Page

Prompt

Admin page for managing your Brikit Blueprints.

Definition

This page is the interface for viewing and managing all of your Brikit blueprints.

Here you will find information about:

- Every space and page blueprint that has been defined for your site
- All of your custom blueprint substitution fields
- Permissions that can be applied to new spaces created from blueprints
- Metadata settings for content created from blueprints

This page is also where you can download and upload your JSON file, which is in fact the source of all of the above information.

There are two ways to get to this page:

1. Navigate via Confluence Administration menu:

   Gear icon in the Confluence header Brikit Blueprint Maker (in sidebar) Blueprint Definitions

2. Direct URL:

   <your Confluence base URL>/brikit/blueprints/admin/viewblueprints.action
