Requires

THEME PRESS

# Changing the Layout

## Prompt

Overriding the default space [layout](#).

## Outcome

Any new page that is created in a space automatically uses that space's default page design. You can override this at any time, and apply a different layout to the content of the page.

## Steps

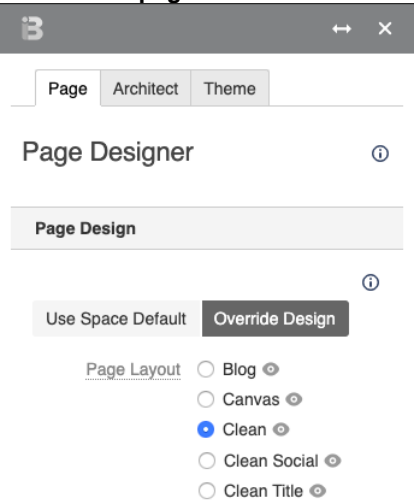

Open the [Theme Press Designer](#) and expand the Page Design accordion from the [Page Designer Tab](#).

Theme Press Designer Page Tab Page Design

Click the **Override Design** button.

Select the radio button that corresponds to the appropriate [layout](#).

Wait for the page to refresh.
