Evaluating Theme Press

Requires

THEME PRESS

Evaluating Theme Press

Prompt
Downloading and installing a trial copy of Brikit Theme Press.

Outcome
Amplify your company culture, engage employees, drive alignment, and increase high-quality collaboration with Brikit Theme Press. Transform the look and functionality of your Confluence knowledge bases, intranets, websites, and portals.

Steps

Install Theme Press

- Follow the installation steps on Installing and Uninstalling Apps
    - (For step 4, type `Theme Press` in the app search box)

Configure Theme Press

- From the same screen, select **Configure**
- Click the **Install** button
- Wait for the process to complete

Apply Theme Press site wide or only to specific spaces

- Change the Confluence Default Theme to apply Theme Press across all spaces
- Select **Default Theme** as the **Current Theme** to only apply Theme Press to specific spaces

Note

Tip

Warning

Info

Good to Know

- Installation of Atlassian Confluence is a requirement for Theme Press installation
- Check the Theme Press Releases page for compatibility information and download links

Some users have reported that after installing Comala apps on a site already using Theme Press, any Theme-Press enabled spaces fail to load (a "Page Not Found" message is shown). This is a known error with the way in which Confluence loads the order of these two apps.

The workaround is simply to *uninstall and then reinstall Theme Press.*
