- THEME PRESS

Brikit Default Theme App

Prompt

An app that allows you to offer the standard look and feel of out-of-the-box Confluence as a theme option.

Definition

When you assign Theme Press as your [Confluence Default Theme](#) for all of your spaces, the out-of-the-box Confluence look and feel is no longer available.

To address this, and still maintain Theme Press as your chosen [Confluence Default Theme](#) site setting, the [Brikit Default Theme app](#) is available for download from the [Atlassian Marketplace](#).

- With this app installed, you have the option of using the Confluence default look and feel on individual spaces.
- This app also allows you to keep your login panel, search results, profile pages, dashboard, and other global pages styled with the out-of-the-box Confluence look and feel.
