# Simple Toolbar - Hamburger Menu

Prompt

Menu with links to common page, display, and user actions.

Definition

This toolbar is a dropdown menu that provides convenient access to a variety of features including:

- Toggling block editing on and off
- Page-level actions such as Share and Watch
- User profile-related actions
- Toggling the visibility of Confluence navigation and tools

In previous versions of Theme Press it was often referred to as the "hamburger menu" due to its icon's three horizontal lines' pictorial resemblance to a hamburger. In later versions, this menu looks like a grid.

This toolbar is only visible to users who are logged in. It is typically located in the header area of a Brikit-themed page, although it can be moved to another location on the page.

Info

> ⓘ Atlassian's application navigator is also sometimes referred to as the "hamburger menu", but that is a different menu than the Brikit Theme Press Simple Toolbar. For more information, please refer to Atlassian documentation .
