THEME PRESS

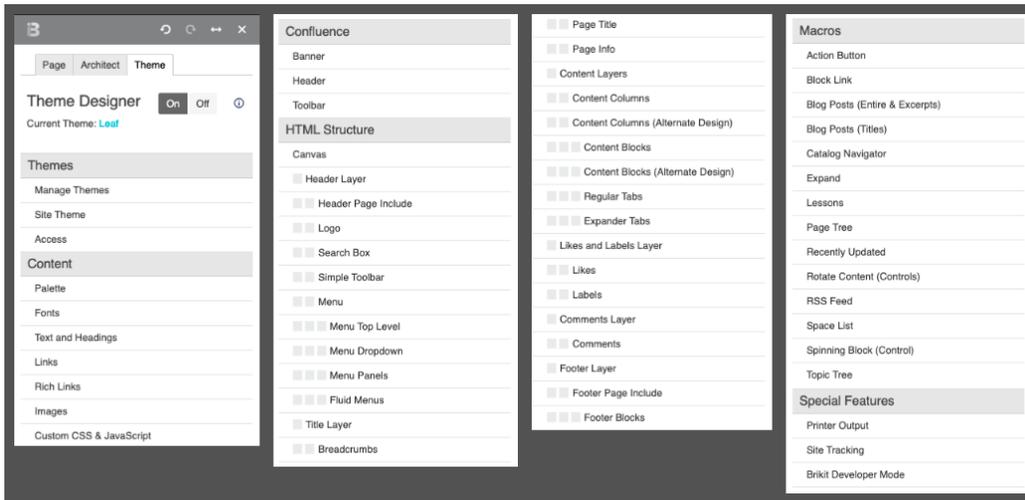

Theme Designer

Prompt

Design options in the [Theme Press Designer](#), allowing you to create or modify [themes](#).

Definition

The Theme Designer is set of comprehensive custom design options available in the Theme Tab of the [Theme Press Designer](#). Using the Theme Designer is how you can [create a New Theme](#) or modifying an existing theme.

Design options and settings in the Theme Designer include:

- Styling of HTML elements like menus, titles, layers, and blocks
- Styling of commonly used macros
- Visibility of Confluence elements like the header, toolbar, and sidebar
- Logo location and configuration
- Images, links, likes, and comments styles

When creating a new theme, the Theme Designer is where you can:

- [Define and use fonts](#)
- [Set up a color palette](#)
- [Add custom CSS and JavaScript](#)
