

Formatting Blocks

Requires

THEME PRESS

Formatting Blocks

Prompt

Designing and positioning content [blocks](#).

Outcome

The style and handling of your content blocks can dramatically change the look of your site.

Steps

Open the Page Tab in the [Theme Press Designer](#).

Theme Press Designer Page Tab (Block 1)

Click on any block (under any Layer and Column)

The designer accordion will open, displaying the following expanders, each with multiple options specific to the block.

Handling

CSS class, tab, meta properties, and display options

Size

Height, overflow, margin, and padding

Background

Background image and color

Border

Width, style, radius, and shadow

Note

Tip

As you select a named block in the [Theme Press Designer](#), the corresponding content block on the page is highlighted on the page.
