Download Link	download here

Highlights

- Control visibility of Theme Press themes
- Control visibility of menus, headers, footers, layouts, and banners
- Allow non-Confluence admins to develop themes
- Allow non-space admins to configure Theme Press space-level settings
- Allow non-admins to send invites and grant users permissions to a space with the new **Invite User** macro
- See which spaces and pages use any given menu, header, footer, layout, or banner
- Create employee directories using Confluence pages with the new **User Group Navigator** macro
- Track activity with Google Tag Manager support

- Up to 50% rendering performance improvement
- Improved cache control for menus, headers, and footers
- Automatic disabling of Theme Press designer after a period of inactivity

- Create great-looking presentations right in Confluence

- Use both the front and back side of a block to provide animated and engaging rich content

- Embed widgets on pages for sharing via Twitter, LinkedIn, and /or email

- Navigate deep and complex structures with new dynamic fluid menus
- Generate menus using space categories
- Get quick access to key features with the new simple toolbar

- View large content with the new full-width toggle for pages
- Layer, column, and block names displayed in designer simplifies complex page design
- Sticky headers
- Improved theme styling options
- Option to download fonts, scripts, and stylesheets from another server

- New **Invite User** macro for non-admins to send invites and granting access to spaces
- New **Social Media Bar** macro for sharing pages via Twitter, LinkedIn, and/or email
- New **User Group Navigator** macro for creating employee directories
- New **Comment** macro for annotating page contents
- New **Move Element** macro for repositioning elements on the screen

- **Catalog Navigator** macro options for displaying tooltips and page titles on hover
- **Catalog Navigator** macro options for space category and multiple space filtering
- **Include Content** macro simplifies access to source page
- **Include Content** macro options for space and label filtering, borders, and display formatting
- **Space List** macro options for displaying categories (for fast menu generation) and improved space filtering
- **Space List** macro options for displaying space descriptions and formatting control
- **Children List** macro option for expanding children on page load
- **Restrict Content** macro option to display a "consolation prize" for users without permissions

- **HTML Wrap** macro option to display invisibly (works great with **Restrict Content** for consolation prizes)
- **Block Link** macro option to open link in new window
- **Rollover Image** Link macro option to open link in new window
- **Rotate Content** macro option to add scroll buttons for user control

- Improved Confluence 5.10 and Data Center compatibility
- Compatible with more add-ons including Talk, Comala Publishing, Glossary, Lively Blog Posts, Sketch, and others
- Improved iPhone 6 compatibility

Plus dozens more fixes and improvements
