

Rotate Content Macro

Relates To

THEME PRESS

Rotate Content Macro

Prompt

Creates a rotating gallery of content.

Definition

The Rotate Content Macro is used to create a gallery that displays images aggregated on another page.

- Ability to control how the content is extracted for display, including:
 - what page is used
 - whether the entire block (with background image) is displayed or just the content within
- Ability to configure:
 - timing of transitions
 - the transition types
- Ability to adjust formatting settings, including:
 - image height
 - image weight
 - whether standard or your own custom positioning images are used
