Topic Tree Macro

Prompt

Displays content based on labels.

Definition

This macro provides a list of topical results based on a specific label or labels attached to content.

- Ability to select multiple labels from pages, blog posts, or attachments
- Labels automatically listed as top-level items. Option to override and use a list of names in place of labels
- Toggle display of page, blog, and/or attachments
- Filter by or specify which spaces from which content is displayed
- Limit the number of results displayed
- Sort alphabetically or by most recent
- Toggle whether the space name, creation date and/or creator is shown
- Toggle appearance of labels with ability to replace hyphens/underscores with spaces, use title case, or remove links
