Page Elements

Prompt

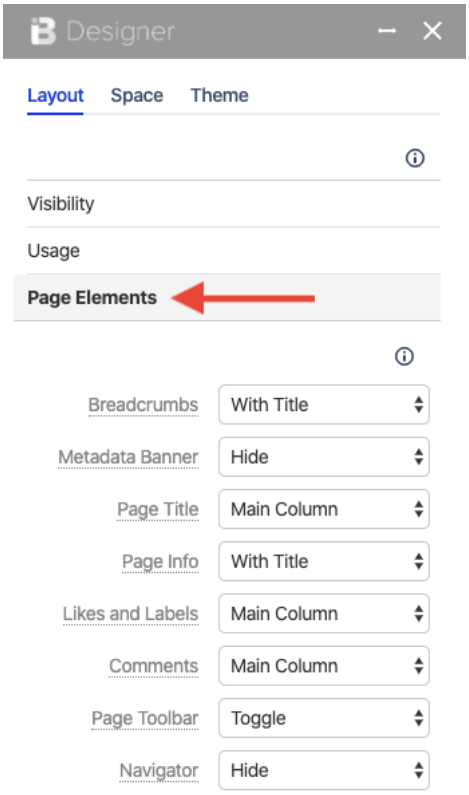

The non-content components of a page, available for control within a page's underlying layout.

Definition

Managed at the layout level, page elements offer component-level control over how a page presents: whether or not page options are available or viewable, and options to fine tune them, including how the page elements are positioned.

The various page elements you can control at the layout level include:

- Breadcrumbs
- Page Metadata
- Page Title
- Page Information
- Likes and Labels
- Comments
- Page Toolbar
- Navigator
