Comments

Prompt

Optional functionality allowing users to add remarks, questions, or other information pertinent to page content.

Definition

As an avenue for collaboration, comments allow on-page discussion and community interaction. Some pages or spaces benefit greatly from such collaboration; in other contexts, however, comments can be out of place, or otherwise undesirable.

As a [page element](#), comments can be toggled off and on, as well as positioned, at the page [layout](#) level.
