Outlook Calendar Events Browser macro key and configuration options.

## Key Title

Key

## Key

outlook-events-browser

## Reference

| Parameter            | Description                                                                                                      | Expected Input | Example Value(s)         |
|----------------------|------------------------------------------------------------------------------------------------------------------|----------------|--------------------------|
| Outlook ID           | Outlook calendar ID (usually looks like an email address).                                                       | Text string    | TeamCalendar@example.com |
| Max Events           | How many events to display. (Default: 99)                                                                        | Integer        | 75                       |
| Max Months           | How many months to display. (Default: 12)                                                                        | Integer        | 10                       |
| No Events Message    | Message to display when no events are found. (Default: No events found.)                                         | Text string    | Sorry, no events here    |
| Show All Button      | Text to display on the button that restores calendars hidden when clicking on the legend. (Default: Show All.)   | Text string    | show all calendars       |
| Show Search Field    | Toggles display of a search field to narrow the events list.                                                     | Check box      |                          |
| Show Month Picker    | Toggles display of a list of months links that scroll the events list.                                           | Check box      |                          |
| Show Calendar Legend | Toggles display of a calendar legend that toggles visibility of each calendar.                                   | Check box      |                          |
| Scroll Height        | Set a fixed height for the calendar display. (Leave blank to grow as needed. Ex: 400px)                          | Number with px | 150px                    |
| Top Margin           | Set a fixed height (numbers only, no units) in pixels for leaving space above the calendar when scrolling.       | Integer        | 375                      |
| Description Limit    | The maximum number of characters to display from the event description. (Leave blank to display no description.) | Integer        | 200                      |
