Outlook Calendar Events Month View Macro Parameters and Key

Prompt
Outlook Calendar Events Month View macro key and configuration options.

Key Title
Key

Key
outlook-events-month-view

Reference

Parameter	Description	Expected Input	Example Value(s)
Outlook ID	Outlook calendar ID (usually looks like an email address).	Text string	`MyCalendar@example.com`
Match Event Titles	A string that event titles must include to be shown on the calendar. Can be a regular expression.	Text string (or regular expression)	`[mM]eeting`
Max Events	How many events to display. (Default: 99)	Integer	`50`
Max Months	How many months to display. (Default: 12)	Integer	`6`
Months In View	Sets the number of months to display in the month calendar view. (Default: 1; Maximum: 4)	Integer	`2`
Month View Width	Set the width for the horizontal scrolling area containing the month calendar view. (Default: 100%)	CSS width value	`75%`
Month View Day Minimum Height	Set the minimum height for the days displayed in the month calendar view. (Default: 120px)	CSS height value	`64px`
Compress Month View	Toggles display of the month calendar view's events. When checked, each day will reflect only whether items are scheduled that day.	Check box	
Show Available Time	If Compress Month View is checked, toggles display to show days and half days that have no events scheduled.	Check box	
Weekends Are Available	If Show Available Time is checked, toggles display of weekends to be available.	Check box	
Calendar Link	If Compress Month View is checked, specifies a URL to take the user when clicking on the calendar.	URL	`https://www.brikit.com`
Calendar Link Tooltip	Adds a tooltip to display when the mouse hovers over the calendar.	Text String	`Click to go to bookings form`
