Outlook Calendar Events Month View Macro

Prompt

Displays a connected Outlook Calendar in a month-by-month calendar view.

Definition

The Outlook Calendar Events Month View Macro displays [a connected Microsoft Outlook Calendar](#) as a monthly calendar with cells for each day as you'd find on a typical wall calendar. Calendar events are listed in chronological order on each day.

Use the [macro parameters](#) to customize the presentation of the calendar, from [displaying multiple months at a time](#) to [showing overall availability](#). There are also built-in CSS styling options for adjusting the height and width according to page design needs.

Info

Looking to display your calendar events as a list? Check out our [Outlook Calendar Events Browser Macro](#).
