

Uploading Architect Pages

Requires

THEME PRESS

Uploading Architect Pages

Prompt

Importing [Architect Pages](#) into your environment.

Outcome

When moving a site designed in Theme Press from one environment to another (such as from staging into production), you will need to move the supporting architect pages.

Steps

Navigate to any [Architect Page](#)

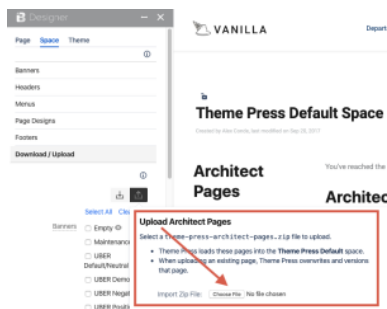

Open the Download / Upload expander in the Space Tab of the Theme Designer

Theme Press Designer Space Tab Download / Upload

Click the upload button

Browse to select

Select a theme-press-architect-pages .zip file for upload.

Note

1. Theme Press expects a zipped file for importing architect pages. **Do not unzip before uploading.**
2. Any architect pages with the same name will be replaced by the newer pages upon import. You can, however, always use the page history option to revert the pages.
