

# Altering the Spinning Block Control Icon

Requires

THEME PRESS

# Altering the Spinning Block Control Icon

## Prompt

Adjusting display of the control icon used for [Spinning Blocks](#).

## Outcome

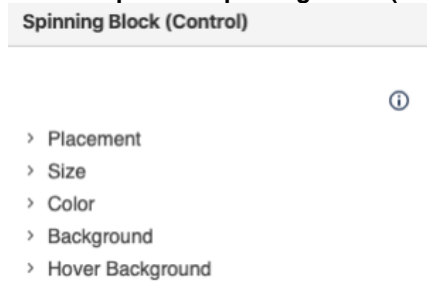

Inserting a spinning block on a page automatically also creates a control icon (curved arrow) with default theme settings applied. Learn how to adjust the image used for this icon, as well as placement, size, and color in the steps below.

## Steps

**Open the Theme Designer**

**Navigate to the Macros Section**

**Click to open the Spinning Block (Control) expander**

**Adjust Placement, Size, and Color as needed**

Use the fields to adjust placement in respect to the block itself. Additionally, you can adjust the color, hover color, and size of the icon.

*Note: you can click on any underlined help text in the designer for more information.*

**Add a background image**

Selecting a new background image and hover background image allows you to alter the look and feel of the control icon.

## Note

## Tip

**Looking to swap out the control icon for a new image?**

To use an alternate image for the control icon, set the color and hover color of the image as `transparent`, and use a different image in the background setting.
