

Altering the Spinning Block Control Icon

Requires

THEME PRESS

Altering the Spinning Block Control Icon

Prompt

Adjusting display of the control icon used for [Spinning Blocks](#).

Outcome

Inserting a spinning block on a page automatically also creates a control icon (curved arrow) with default theme settings applied. Learn how to adjust the image used for this icon, as well as placement, size, and color in the steps below.

Steps

Open the Theme Designer

Navigate to the Macros Section

Click to open the Spinning Block (Control) expander

Adjust Placement, Size, and Color as needed

Use the fields to adjust placement in respect to the block itself. Additionally, you can adjust the color, hover color, and size of the icon.

Note: you can click on any underlined help text in the designer for more information.

Add a background image

Selecting a new background image and hover background image allows you to alter the look and feel of the control icon.

Note

Tip

Looking to swap out the control icon for a new image?

To use an alternate image for the control icon, set the color and hover color of the image as transparent, and use a different image in the background setting.
