BLUEPRINT MAKER

Blueprint Wizard

Prompt

The set of windows that walk you through the creation of a new page or space from its Blueprint.

Definition

The Blueprint Wizard is what guides you through the creation of a new page or space based on its [Blueprint](#). After selecting a Blueprint from the [Blueprint Menu](#), the Blueprint Wizard opens. It is a set of modal windows that asks you to fill in any values for [substitution fields](#) and also the name and location of this new page or space. Upon completion of the Wizard, you will be directed to the new content.
