

Page Title

Relates To

THEME PRESS

Page Title

Prompt

The name for a page, generally used to identify page content and purpose.

Definition

As part of the overall set of [page elements](#), the page title can be toggled off and on, as well as positioned, at the page [layout](#) level.

Info

- The page title can be revised (edited) from any [block](#) on a page: simply edit the block, and the title becomes editable too.
- The page URL generally will match the page title (with "+" between words); however, If the title does contain special characters, the page URL will be a unique numerical page ID.
