

Setting Global Site Permissions

Setting Global Site Permissions

Prompt

Steps to manage site-wide roles to groups, individuals, and anonymous visitors.

Outcome

This guide is to help [System Administrators](#) set global permissions across the entire Confluence site. This means enabling roles for groups and individuals, as well as setting global access permission to anonymous visitors.

Steps

Navigate to the View Global Permissions page

This page is in the Confluence Administration area (or "back end"). You must be a [System Administrator](#) to access this page.

There are two ways to access the Global Permissions page.

- Navigate via the [Confluence Administration menu](#):

Confluence header Gear icon  **General Configuration Global Permissions**

Located in the left-column sidebar, under **Users & Security**

- Direct URL:

<your [Confluence base URL](#)>/admin/permissions/globalpermissions.action

Click the "Edit Permissions" button

Located in the top-right corner of this page. This will toggle open the permission selection options.

Grant permission to groups or individuals as needed

It is recommended that you create all your groups in advance before setting global permissions.

The screenshot shows the 'Edit Global Permissions' page in Confluence. The sidebar on the left contains various navigation links. The main content area is titled 'Edit Global Permissions' and includes a description of global permissions. Below this, there are sections for 'Licensed Users', 'Groups', 'Individual Users', and 'Anonymous Access'. The 'Groups' section contains a table with columns for 'Personal Space [1]', 'Create Space(s) [1]', 'Confluence Administrator [1]', and 'System Administrator [1]'. The table lists three groups: 'brkit-internal', 'confluence-administrators [1]', and 'confluence-users'. The 'Individual Users' section states that no users currently have individual global permissions. The 'Anonymous Access' section allows users to choose which spaces anonymous users can access, with options for 'Use Confluence [1]' and 'View User Profiles [1]'. At the bottom, there are 'Save all' and 'Cancel' buttons.

Select the appropriate roles

To help you understand the roles, please visit [Confluence Administrator](#) or [System Administrator](#).

You may also read the [Atlassian Documentation](#) for more information.

Click "Save all" at the bottom of the page
