

Masthead Image Macro

Relates To
THEME PRESS

Masthead Image Macro

Prompt

Applies an image as a background to any elements on the page with the CSS class 'masthead'.

Definition

This is a macro used to control the styling and positioning of a background image. Insert the macro in any [block](#) on the page, [complete the macro parameters](#), and then add the class "masthead" to any layer, column, or block (in the element's "Handling" field within [the Theme Press Designer](#)). The image specified in the macro parameters will then become the background image for those elements.
