Applying and Removing Cascaded Filters

Requires

TARGETED SEARCH

Applying and Removing Cascaded Filters

Prompt

Right-click a filter to apply it to the current page and all of its children.

Outcome

Cascaded filters make it easy to apply filters to an entire sub-tree of pages. Learn how to apply or remove a cascaded filter.
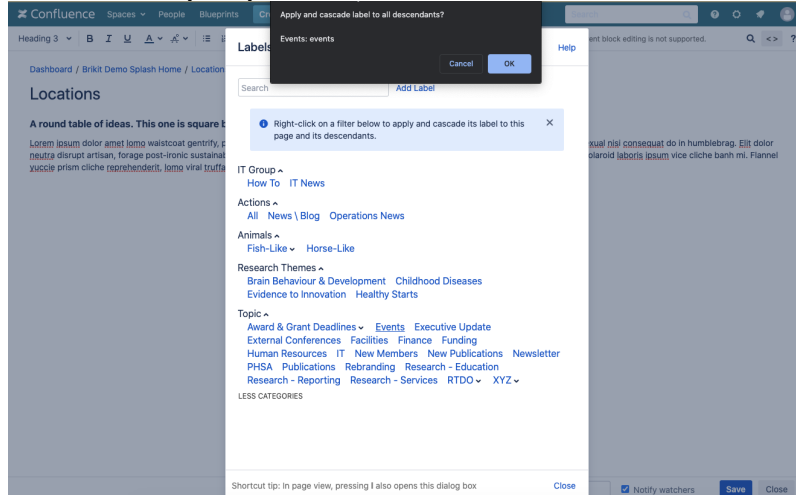

Steps

Toggle the label application window

You can do this by editing a page or block and clicking on the label icon 🏷️ at the top of the editing window.

Right-click on any filter

By right-clicking, you are applying the cascading label to the current page and its children. There will also be a message in blue describing this action.

Click OK to the prompt, then "Close" the window

To remove a label, navigate to the parent page

You may only remove a cascaded label on the parent page.

Toggle the label application window

Click the "x" on the pink cascaded filter

All cascaded filters are indicated by their pink background color.

Click "Close"
