

Enabling and Disabling Rich Links in the Search Panel

Requires

TARGETED SEARCH

THEME PRESS

Enabling and Disabling Rich Links in the Search Panel

Prompt

With Theme Press installed, configure search results to show as rich links, or not.

Outcome

Search results are presented as stylized [rich links](#) when Theme Press is installed. Use this guide to disable or enable the display of results as rich links.

Steps

Navigate to the Targeted Search Configuration Page

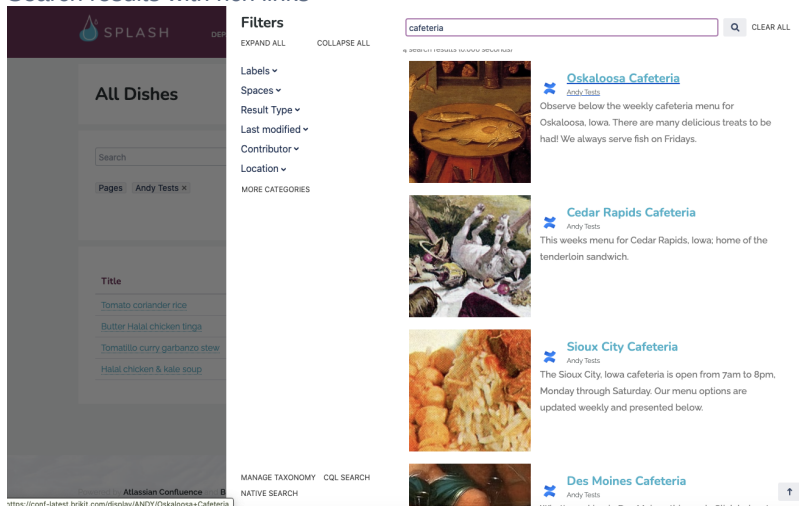

Confluence Gear Icon  > General Configuration > "Brikit Targeted Search" > Configure

Edit the Enable/Disable Rich Links option

Click the pencil icon to edit the option. You will be prompted to click OK to the change.

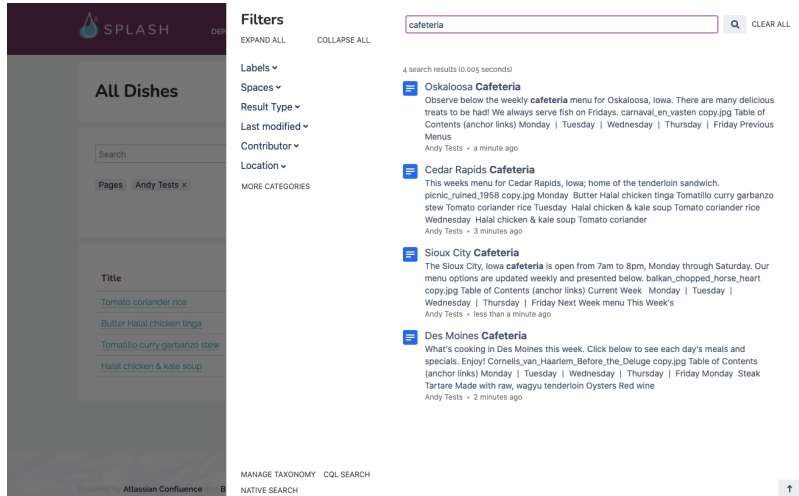

Note

Search results with rich links

This screenshot shows search results for "cafeteria" in Confluence. The left sidebar contains a search bar and filters. The main content area displays four rich link results, each with a thumbnail image and a title. The results are: Oskaloosa Cafeteria, Cedar Rapids Cafeteria, Sioux City Cafeteria, and Des Moines Cafeteria. Each result includes a brief description and a link to the full menu.

Search results without rich links

This screenshot shows search results for "cafeteria" in Confluence, but without rich links. The left sidebar is identical to the previous screenshot. The main content area displays four search results, each with a title and a brief description. The results are: Oskaloosa Cafeteria, Cedar Rapids Cafeteria, Sioux City Cafeteria, and Des Moines Cafeteria. Each result includes a link to the full menu.
