Targeted Search Configuration Page

Prompt

Use this page to manage search panels display options, tooltip text, rich link, and filter management options.

Definition

This page is accessible to system administrators and is used to control a number of Targeted Search configuration options, including:

Filter Category Order	Filter categories will appear in listed order. Remaining categories will appear afterward, in alphabetical order.
Cascade Labels User Groups	In addition to Space Administrators, members of the listed user groups will be able to apply cascading labels to pages.
Taxonomy User Groups	In addition to Confluence Administrators, members of the listed user groups will be able to edit Targeted Search filters.
More Help Link	Adds a link to the Search Help panel for More Help.
Default Filters Tooltip	Hover text for the "Default" radio button in the Search panel.
All Filters Tooltip	Hover text for the "All" radio button in the Search panel.
Any Filters Tooltip	Hover text for the "Any" radio button in the Search panel.
Disable Rich Links	If using BrikIt Theme Press, display search results using the default text-based presentation.

To access the page, navigate as follows:

Confluence Gear Icon  > General Configuration > "BrikIt Targeted Search" > Configure
