

Giving Permission to Non-Admins to Manage the Taxonomy

Requires

TARGETED SEARCH

Giving Permission to Non-Admins to Manage the Taxonomy

Prompt

Allow non-admins to create and [edit filter groups and filters](#).

Outcome

By default only [system administrators](#) can add and edit filter groups and filters. By changing this option, members of the provided user groups will be able to edit Targeted Search filters as well.

Steps

Navigate to the Targeted Search [Configuration Page](#)

Confluence Gear Icon  > General Configuration > "Brikit Targeted Search" > Configure

Edit the 'Taxonomy User Groups' option

Click the pencil icon to edit the option.

Enter the name of a group

Enter as many groups as you want, separated by commas. Each group in this list will be able to access the [Search Filters](#) page to add and edit (and delete) filter groups and filters.

Click 'Save'
