Relates To

TARGETED SEARCH

Targeted Search 3.1

Prompt

Search multiple contributors and specified macro parameters, plus many fixes

Reference

Version	3.1
Release Date	2021-03-22
Compatibility with Confluence Server and Data Center	6.13 through 7.11
Download Link	download

Featured Improvements

Featured Improvements

Search using macro parameters

While Confluence adds macro body contents to the search index, it ignores the text in macro parameters. Targeted Search fills this gap with a new option on the Configure Targeted Search admin panel where you can specify which macro parameters to add to the search index. Supports all Confluence, third-party app, and user macros.

Search by multiple contributors

Multiple users can now be selected in the search panel, matching content from any number of contributors.
