Reference

Version	3.2
Release Date	2021-03-22
Compatibility with Confluence Server and Data Center	6.13 through 7.11
Download Link	download

Featured Improvements

Featured Improvements

Restrict the page designs available in a space

A new Restrict Page Designs space admin panel lets you specify which page designs are presented to regular users in the Theme Press Designer. To configure landing pages and handle special requests from users, Space and Confluence administrators always see all page designs.

Inherited labels are now displayed on rich links

In [Targeted Search](#), [labels can be cascaded](#) to child pages. These are now displayed in [rich links](#) along with directly applied labels.
