

Page Metadata Macro

Relates To
CONTENT FLOW

Page Metadata Macro

Prompt

Display page status, page owner, space owner, and other information.

Definition

The Page Metadata macro gives you an easy way to display ownership and status information wherever the macro is placed. The "metadata" being displayed are special fields available to you from [Content Flow](#), including:

- [Page Status](#)
- [Publish Date](#)
- [Space Owner](#)
- [Page Owner](#)
- [Document ID](#)

This macro allows you to display all of this information at once, or simply insert the macro multiple times on the page and select each element separately.
