# Using the Page Metadata Macro to Display Content Ownership and Other Page Data

## Prompt

Display Page and Space Owners, Publish Date, Document ID, and Page Status.

## Outcome

The [Page Metadata Macro](#) can be used, and used again, to display special Content Flow information, including status, ownership, and publish date.

## Steps

**On any page, insert the Page Metadata Macro**

Learn more about [adding macros to a Confluence page](#).

**In the macro edit window, make your information selections**

You may click to show the following information:

- [Page Status](#)
- [Publish Date](#)
- [Page Owner](#)
- [Space Owner](#)
- [Document ID](#)

**Save the macro edit window**

**Optionally, insert the macro again to display additional information**

## Note

## Tip

In organizations with [publishing workflows](#), the use of the Page Metadata Macro can be especially beneficial. Use it repeatedly in a table to create an easy-to-read set of document information, as follows:

Document Title	...
Document Owner	{Page Metadata Macro with <a href="#">Page Owner</a> selected}
Document ID	{Page Metadata Macro with <a href="#">Document ID</a> selected}
Status	{Page Metadata Macro with <a href="#">Page Status</a> selected}
Official Publish Date	{Page Metadata Macro with <a href="#">Publish Date</a> selected}
Version	...

Then, insert this table into [Confluence's Page Properties Macro](#) in order to improve discoverability and reporting across your documentation.
